RICHARDSON, Texas – Safety-Kleen Systems announced that Detroit Diesel has approved EcoPower Heavy-Duty Diesel 10W-30 CJ-4/SM for use in Detroit Diesel engines. This re-refined engine oil helps fleets improve fuel economy up to 1.5%, delivers better cold-weather starts, and protects engines and protects the environment.

The Detroit Diesel approval includes Series 50, Series 60, MBE 4000, MBE 900 and HDEP engines equipped with EGR and Diesel Particle Filters (DPF) as specified in 93K218. EcoPower Heavy-Duty Diesel 10W-30 CJ-4/SM has also been approved by or meets the requirements of Cummins, Caterpillar, Mack, Mercedes-Benz, Navistar and Volvo.

“The approval from Detroit Diesel is further evidence that EcoPower protects engines and meets OEM requirements,” said Curt Knapp, Executive Vice President, Marketing and Oil Re-refining Sales for Safety-Kleen. “Fleets who switch score the trifecta—better fuel economy, engine protection and environmental protection.”

Rodney Walker, Technical Director for Safety-Kleen, points out the mileage, environmental and technical advantages of using EcoPower Heavy-Duty Diesel 10W-30 CJ-4/SM.

“It can boost fuel economy by as much as 1.5% compared to using EcoPower Heavy-Duty Diesel 15W-40 CJ-4/SM. A fleet using 8 million gallons of diesel fuel at $4 per gallon could save up to $480,000. That helps lower a fleet’s costs while reducing their carbon footprint. EcoPower Heavy-Duty Diesel 10W-30 CJ-4/SM is also formulated for better cold-temperature starts and provides excellent varnish, sludge and carbon deposit control.”

EcoPower helps protect the environment by requiring up to 85% less energy to produce than oil made from virgin crude. A fleet that uses 250,000 gallons of EcoPower per year could reduce greenhouse gas emissions by more than 1,900 metric tons per year. That’s equal to growing over 49,000 trees for 10 years in an urban environment.

Safety-Kleen’s re-refining process makes engine oil a sustainable resource. If oil is burned as a fuel source for its thermal value, its effective use is over. But when used oil is recycled into new oil products, like EcoPower, it becomes a sustainable resource that can be re-refined over and

over again. And because EcoPower is recycled and re-refined from reclaimed engine oil, it also helps reduce our dependence on crude and foreign oil. It takes 42 gallons of crude oil to make the same amount of high-quality engine oil you get from recycling 1 gallon of used engine oil.

EcoPower products include:

For heavy-duty diesel:

- 15W-40 CJ-4/SM
- 10W-30 CJ-4/SM
- NGP-2 15W-40 Natural Gas Engine Oil

For gasoline engines:

— Synthetic Blend 5W-20, 5W-30 and 10W-30 API-SN/ILSAC GF-5

— dexos1™ Licensed Synthetic Blend 5W-30

— High Mileage 5W-20 and 5W-30 API-SN/ILSAC GF-5

About EcoPower

EcoPower is more than just engine oil. It is part of a much bigger effort by Safety-Kleen, the largest collector and re-refiner of used oil in North America. In 2011, Safety-Kleen collected approximately 200 million gallons of used oil. EcoPower doesn't just conserve resources; it

protects them by keeping used motor oil out of our land and ground water, making it truly an oil change for the better. The result is an API-licensed engine oil that meets or exceeds all North American standards for engine protection. For more information about EcoPower, please visit www.ecopoweroil.com

About Safety-Kleen

Safety-Kleen Systems is a leading North American used oil recycling and re-refining, parts cleaning and environmental solutions company, with approximately 4,200 employees serving more than 200,000 customer locations in the United States, Canada and Puerto Rico. Safety-Kleen provides a broad set of environmentally-responsible products and services that keep North American businesses in balance with the environment. Safety-Kleen is a wholly owned subsidiary of Clean Harbors, North America's leading provider of environmental, energy and industrial services. For more information about the company, please visit www.safety-kleen.com .
